Minutes

September 17, 2025 @ 9:30 am
Mayers Memorial Healthcare
Burney Annex Boardroom
20647 Commerce Way
Burney, CA 96013

These minutes are not intended to be a verbatim transcription of the proceedings and discussions associated with the business of the board's agenda; rather, what follows is a summary of the order of business and general nature of testimony, deliberations and action taken.

1	CALL MEETING TO ORDER: Les Cufau called the meeting to order at 9:33 am on the above date.			
BOARD MEMBERS PRESENT:			STAFF PRESENT:	
Les Cufau, Director Jim Ferguson, Director			Ryan Harris, CEO Jack Hathaway, Director of Quality Keith Earnest, Chief Clinical Officer Theresa Overton, Chief Nursing Officer Lisa Neal, Board Clerk	
2	CALL FOR REQUEST FROM THE AUDIENCE – PUBLIC COMMENTS OR TO SPEAK TO AGENDA ITEMS			
	None.			
3	APPROVAL OF THE MINUTES:			
	3.1	Regular Meeting – August 27, 2025 Update Staff Present to include Keith Earnest, CCO A motion was moved, seconded, and the minutes were approved.	Cufau, Hathaway	Approved by All
4	DIRECTOR OF QUALITY: Jack provided a written report. He further discussed that the Plan of Correction (POC) for SNF had been accepted, and there would not be a resurvey. Expecting the Denial of Payment for New Admissions (DPNA) to be lifted and admissions reinitiated effective Oct 15, 2025. For medication errors, staff education and tracking are in place. Next steps include aligning the medication errors with the corresponding medication name and nurse ID and determining an appropriate threshold. Theresa discussed nursing changes and implementations in SNF. In FR, a change has been implemented within PCC that requires nurses to answer based on a pain scale, and it is currently in a trial period at the Burney Annex. The nurse educator is doing 1x1 audits with nurses. Jack will include Quarterly Hospice Quality reporting and SNF Quality. Keith reported that for Hospice, the majority of funds are spent at the beginning of a stay and discussed educating the community on the range of Hospice services that can be provided before the end-of-life period. Ryan reported that the lab survey identified a few issues ("tags"), while the clinic survey had no identified tags.			
5	OTHER INFORMATION/ANNOUNCEMENTS:			
7	CLOSED SESSION ITEMS:			
8	ADJOURNMENT: at 10:28 am Next Meeting is October 29, 2025			

Board Quality Report September 2025

Mortality in the Hospital

Reviewing these reports with the additional knowledge that comes from the analytics training incorporated with the provider optimization work that is underway. I will confirm that this is the best way to report this and get back to you next month.

Patient Experience

I have consulted with Press Ganey about the time frames on the reports, and currently, the battery of reports that we can access has a time lag due to the various reporting windows used nationwide for those reports. The data will have a lag due to the time frames allowed for collecting and reporting it to CMS. I am waiting to see if we can have the option of running our own timeframes in our reports; the PG team said they would get back to me.

With the above in mind, please see the attached document, and we can review it further online during the meeting.

PI Review

We can review current findings in Teams during the meeting.

Risk (RL6) Review

Refer to the following pages for graphs – I have rearranged them for a clearer view of the data.

Medication error data, as requested, will be provided in the meeting due to the employee-specific data it contains

State

Current state work is underway – we did have a single reportable state visit with no deficiencies found in our Skilled Nursing Facility.

Complaints

I have received no official reportable complaints this month.

Medication Error Audit

As you can see, there is no medication error audit this month. We had some conflicting data points that need to be addressed. Please also note that the data for medication errors tracked in RL6 only covers the period from September 1st to the middle of the month before Keith left for Kansas City for the NRHA conference. We will correct the data issues and resume the audit in October.

Conclusion

This month was busy with the provider optimization work kicking off, as well as the SNF Richter calls kicking off for our SNF work. We also received some subpoenas and other irons in the fire that are finally coming to fruition. Luckily, we have made enough headway on the other projects that I am working on that there is capacity for the work.

I do have one or two things that I must line up and address for i2i and the QIP work that we have underway for the 2025 reporting year for that program. Reporting for this will be in June; however, I would like to have the reporting data and information completed by the end of January so I can just check my numbers against the claims data that I will be receiving from Partnership in March.

All in all, September was another fantastic month in Quality for the district here. Thank you for your continued support.

Respectfully submitted, Jack Hathaway – DOQ

Safety and Security Quarterly Report- October 2025

Submitted by: Dana Hauge, Director of Safety and Security, Safety Officer

Introduction

This quarter has been both productive and impactful, with concentrated efforts on enhancing the district's safety and security programs. Work included developing and tracking additional performance improvement indicators, monitoring data to identify trends, and exploring cost-reduction opportunities across safety and emergency operations.

Department Highlights

Approved to pilot a new addition to the current Versa Badges in the ER with the addition of personal panic buttons. Alerting capabilities will be integrated into cell phones and desktops, enabling designated individuals to receive timely notifications. This aligns with the establishment of new safety and emergency response teams for the district as part of my Capstone Project and FY26 priorities. The project will be piloted for a year to gather data on the validity of the new programming.

Completion of security protective measures in admitting is expected by the end of the year. This includes the addition of bulletproof glass and new door locking mechanisms in the ER waiting area.

I attended and spoke at the California Hospital Association Disaster Conference, where I served as a committee member, helping to select and introduce speakers. With Modoc Medical Center, I spoke about the differences in disaster response for rural facilities and conducted a small tabletop exercise focusing on our E. coli water disaster in 2023.

Developed a de-escalation/ workplace violence in-house training to cut overhead costs that has been approved by ACHC and will serve as our district-wide annual and in-the-moment training.

OASIS Teams have developed district-wide projects and are gaining executive support, with projects set to be presented to staff soon.

Safety, Emergency, and Environment of Care Committee Highlights and reviewed data.

Infection Control Risk Assessments

ICRAs are completed for all maintenance projects in patient care areas and are reported on a monthly basis. Both Infection Prevention and Safety sign off, looking for dust particles, sound, egress, and other notable conditions that could be a concern.

Fall River Facility Door Compliance

Weekly log, required by ACHC testing self-closing mechanisms on doors with a fire rating, per plan of corrections. A consistent 98% will mark a successful correction.

Month	Total Inspected	Passed	Failed	Percentage Passed	Percentage Fail
September	668	655	13	98%	2
August	668	653	15	98%	2%
July	668	664	4	99%	1%
June	668	646	22	97%	3%
May	835	817	18	98%	2%
April	668	648	20	97%	3%
March	668	643	25	96%	4%

Relative Humidity Data from OR 1

Graphs indicate that humidity levels fall within the required range of 30–60% RH, as specified by the manufacturer and ACHC standards. Maintenance has installed a humidifier, as reflected in the September graph. The upcoming data is expected to reflect consistent readings, particularly on endoscopy days.

July 2025. 953 sample points. Mean = 47.2 relative humidity

September 2025. 1085 sample points. Mean 43.7 relative humidity.

Landauer reports are presented annually to the SEEC. Radiology exposure rates are unavoidable and are monitored by a dosimeter worn near the collar of their scrubs. Our rates are low and show a safety culture within the department.

Fire Systems

- Hue & Cry Inc. has assumed responsibility for monitoring the fire systems at the Fall River campus.
- The annual inspection, conducted on September 24, 2025, was completed without identifiable failures or deficiencies noted.
- Smoke detector sensitivity testing was successfully completed on September 23, 2025.
- The SEEC participated in facilitating the quarterly fire drill for the first time and was pleased with the participation and process.
- The fire drills were successful overall, with one door identified for adjustment to ensure proper self-closing functionality.

Security Incidents

Total for District = 19

- Eight events required a call to the Sheriff's Department
- Largest response was for non-patient disturbances, verbal or violent. A person who is unwanted on the property or is causing an annoyance. Ten events.

Data Comparison for July- September for the year 2024 vs. 2025

	Jul	Aug	Sep	Oct
2024	3	2	0	7
2025	7	4	8	5

First Aid & Injuries

Fall River Campus

- Four first aid injuries
- Two reportable injuries
- 3 days missed work.

Burney Campus

- Four first aid injuries
- Three reportable injuries
- 22 days missed work.

A new breakdown of the types of injuries categorizes them under the following categories.

- Safe Patient Handling
- Ergonomics
- Slips, Trips, and Falls
- Equipment Related
- Other- security related
- Other- environmental

In the first quarter of monitoring the new classifications, we are closely tracking ergonomic and equipment-related injuries. District-wide education will be implemented next quarter to address these findings. Additionally, with the anticipated increase in slips, trips, and falls due to changing weather conditions, proactive education will be offered.

Disaster Events

			1. Incidents that are alerted to for possible emergency response	
			2. Monitored events that may cause the need for any level of response	
			3. Incidents that require action in relation to an event.	
			4. Incidents that are classified as an emergency & require full response	
			5. Trainings; drills table tops	
Type	DATE	DAYS/HOURS		
5	5/22/2025	5 hours	Table top for MCI and infectious/ hazardous response	
1	5/30/2025	under 4	Code Triage Alert due to small fire adjacent to Fall River Campus.	
1	7/5/2025	under 4	Alert due to small wildfire within one mile of the annex.
